

SAVOIR FAIRE IN ELECTRONICS

Our Savoir Faire, particularly in Transport, Energy, HVAC, Automotive and Medical industries, allows to provide our customers services based on two important words: Partnership and Value-added.

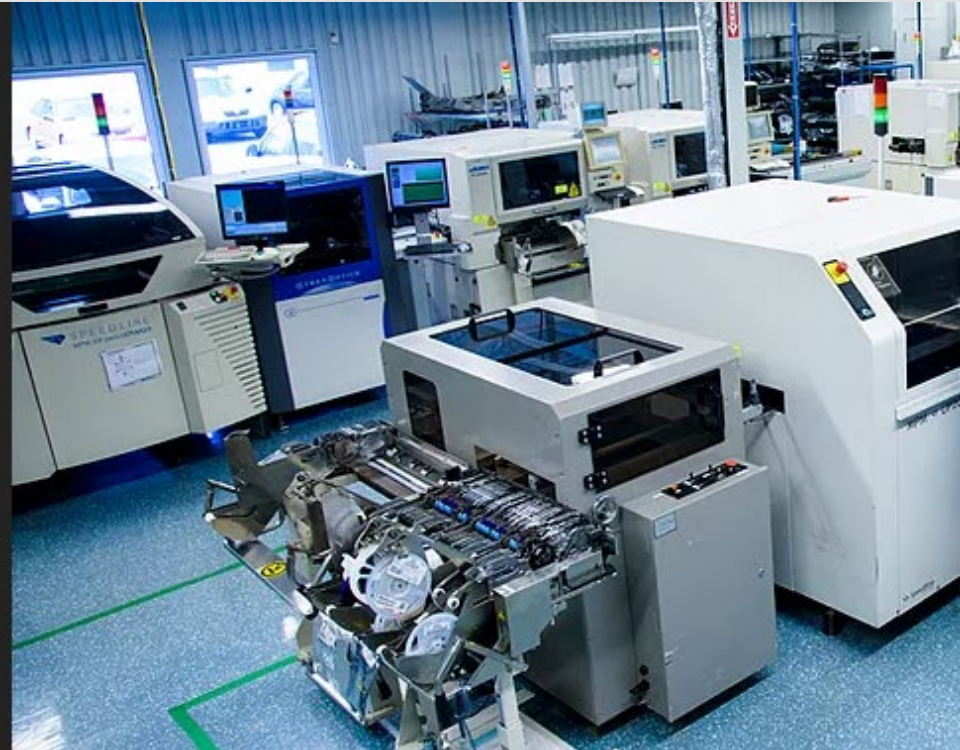

OUR BUSINESS

Our mission

M2S is partnering with manufacturers located in North America, offering electronic value-added subcontracting, designed to meet the customer's expectations.

In accordance with our values: Progress, Control and Harmony.

Our values

PROGRESS

To grow profitably from our talents and our skills

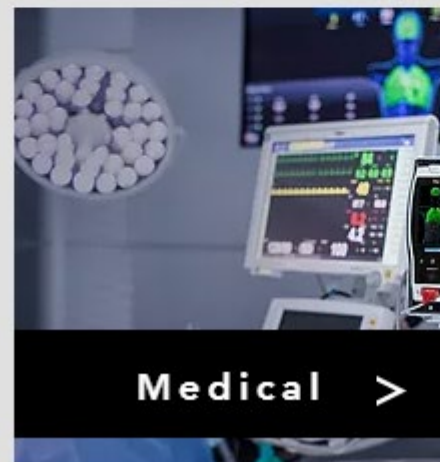

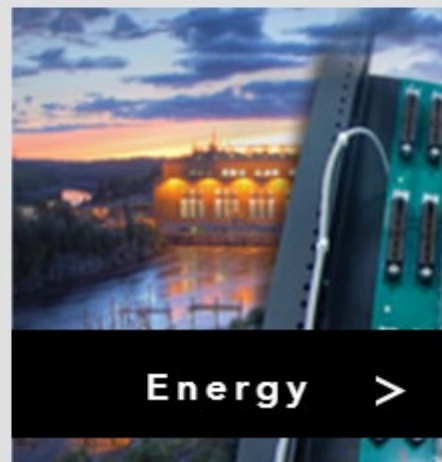

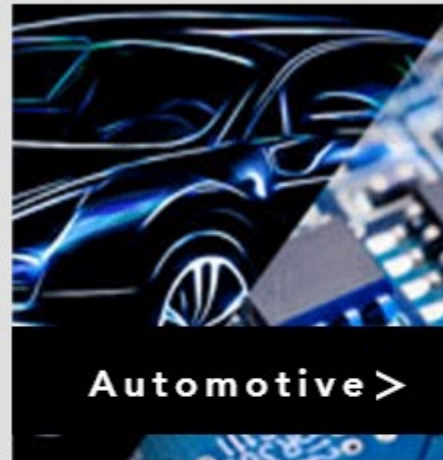

CONTROL

Using method (or process), repeatedly reaching established goals.

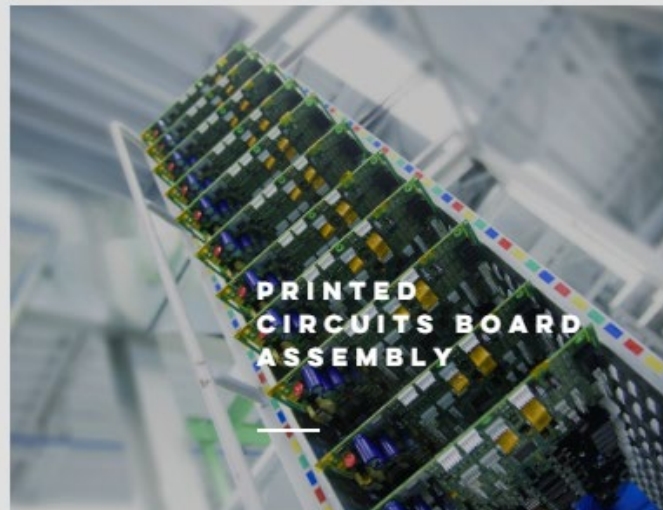

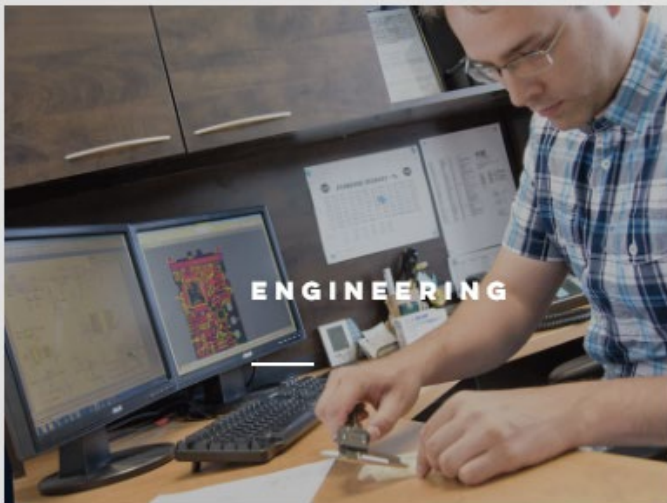

HARMONY

The ability for each individual to rally to a consensus reached by the group.

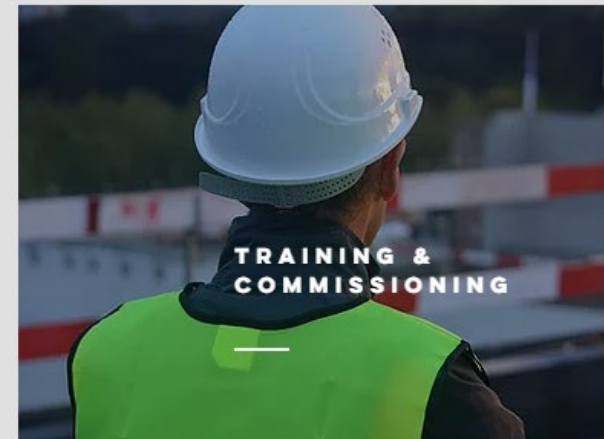

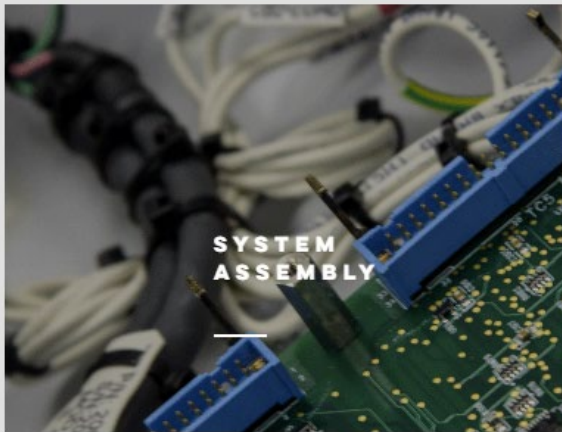

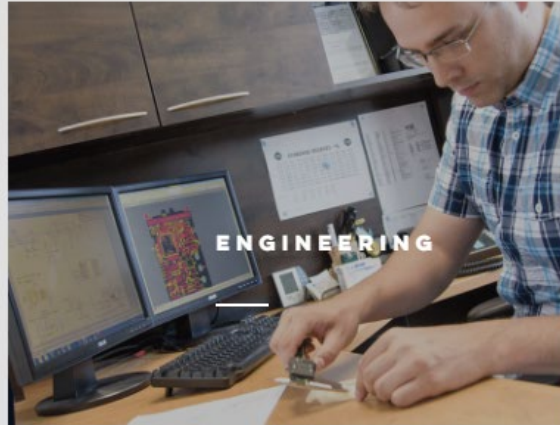

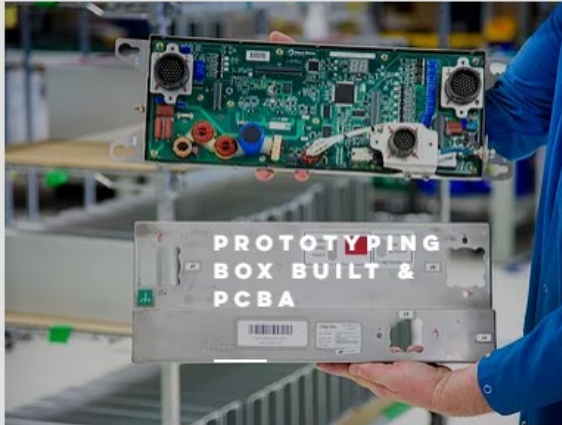

OUR INDUSTRIES

OUR SERVICES

OUR SERVICES

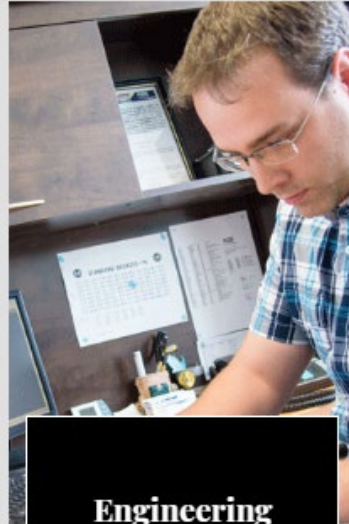

HVAC

Always on the lookout for emerging technologies,
our know-how in electronics will keep you a leader in your market.

Box Built &
PCBA**

Engineering

**Printed Circuit
Board Assembly**

System Assembly

M2S Electronics provides services from design to manufacturing and integration of your turnkey electronic products.

M2S Electronics has supplied many projects over the years:

Power circuit and control cards for :

- Air exchangers
- Kitchen hoods
- Furnaces
- Humidifiers and dehumidifiers
- Air conditioners
- Heat pumps for residential and commercial applications

PROTOTYPING SERVICES - BOX BUILT & PCBA

At M2S we understand the value of prototyping services. As an electronic contract manufacturer, we understand our customers challenges met at the prototyping step. Our mission is to offer an agile service to help you to meet your target date.

Our NPI services are of course manufacturing of PCBA and complete box built assembly, but could be also for design DFA & DFT early stages and electrical harnesses manufacturing.

ENGINEERING SERVICES

Define

- Feasibility Study
- Proof Of Concept
- System Design
- Project Planning
- Requirements Management

Design

- Electronics
- Firmware
- Software
- Mechanical Design
- Industrial Design

Industrialize

- Design for Manufacturability (DFM)
- Design for Testability (DFT)
- Cost Reduction
- Configuration Management

Test

- Qualification Testing
- Production Testing
- Compliance Testing
- Test Equipment Design
- Environmental Chamber Testing (Burn-in)
- Product Life Cycle Support

Support

- Issue Tracking
- Training
- Commissioning on-site

INTEGRATION OF ELECTRICAL AND ELECTROMECHANICAL SYSTEMS AND SUBSYSTEMS

Manufacturing commissioning subsets and integration of electronic services and electromechanical assemblies

- Box Built and electronic assembly services
- Our facilities includes staff and production workers trained to produce printed circuit boards assemblies according to IPC610 & 620

Harnesses assembly

- All wire harness assemblies are manufactured to meet specifications on customer supplied drawings or prints
- Custom Kitting Solutions will allow you to: Save Time and Resources, Reduce Waste and Save Space
- Our facilities include staff and production workers trained to produce assemblies to UL 508A.

PRINTED CIRCUIT BOARD ASSEMBLY

Development, manufacturing, integration, sales and support of PCBA

- Production of PCBA
- Just-in-time production capacity

Your Premium White Label Partner for HVAC Controls

Being fully customizable design platforms, M2S thermostats allow endless possibilities for the end-customer in terms of design, functionality.

We have the thermostats that meet your needs...
whether you are looking for commercial or residential HVAC control, or human-machine interface, M2S will help you meet today's challenge.
